US-09-489-039A-12688

US-09-489-039A-12688

Sequence 12688, Application US/09489039A

Patent No. 6610836

GENERAL INFORMATION:

APPLICANT: Gary Breton et. al

APPLICANT: Gary Breton et. al

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA

TITLE OF INVENTION: NUCLEIC ACID AND THERAPEUTICS

FILE REFERENCE: 2709.2004001

CURRENT APPLICATION NUMBER: US/09/489,039A

CURRENT FILING DATE: 1999-01-27

PRIOR FILING DATE: 1999-01-29

NUMBER OF SEQ ID NOS: 14342

SEQ ID NO 12688

LENGTH: 428
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ij

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

amino acid sequence predicted from the product
which results from amplification of the mouse
                                                                                                                                                                                                                                                                                                                                                                                             Sequence 9, Application US/08241387

Patent No. 5589570

GENERAL INFORMATION:

APPLICANT: Tamura, Richard N.

APPLICANT: Quaranta, Vitc

TITLE OF INVENTION: INTEGRIN ALPHA SUBUNIT CYTOPLASMIC

TITLE OF INVENTION: DOMAIN POLYPEPTIDES, ANTIBODIES AND METHODS

NUMBER OF SEQUENCE. 16

CORRESPONDENCE ADDRESS:
                                 . NAME/KEY: Domain
. NAME/KEY: Domain
. LOCATION: 108.112
. OTHER INFORMATION: /note= "The cytoplasmic sequence
. OTHER INFORMATION: CDFFK begins at amino acid position 108."
US-07-695-564-9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              /note= "The cytoplasmic sequence CDFFK begins at amino acid position 108."

Sequence 6959, Application US/09328352
Patent No. 6562958
GENERAL INFORMATION:
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO ACINETOBACTER TITLE OF INVENTION: BAUMANNII FOR DIAGNOSTICS AND THERAPEUTICS
FILLE REPERENCE: GTC99-0328,352
CURRENT FILING DATE: 1999-06-04
NUMBER OF SEQ ID NOS: 8252
LENGTH: 272

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
